

**SOUTH ARSENAL ROAD
WILMINGTON, ILLINOIS**

Resident Engineering services were provided for two roadway widening and reconstruction contracts with a total length of approximately 3 miles and a total construction cost of \$8.4 million. The work performed as part of the reconstruction project consisted of earth excavation, construction of storm sewers and drainage structures, combination curb and gutter, hot-mix asphalt pavement, hot-mix asphalt shoulders, and thermoplastic pavement markings. The west contract was processed for MFT funding and the east contract was processed following Federal guidelines. The Project required coordination with IDOT, Will County and the City of Wilmington for permitting and contract processing.

Client: Joliet Arsenal Development Authority

Service Provided:

- Full-time inspection and observation of all contractors' operations
- Coordination of material testing
- Address the needs the of the businesses and residents
- Inspection and documentation of all traffic control
