

**STONE QUARRY BRIDGE, COLES COUNTY, ILLINOIS**

Phase I and II planning and design services for the replacement of the timber deck, rail and stringers of the existing Pratt (Whipple) Thru Truss. The existing deck received extensive damage during severe flooding in Coles County in June 2008. Coles County was declared a Disaster Area and Federal Disaster Aid funding was approved for repairing the structure to its pre-disaster condition. The bridge is registered on the National Registry of Historic Places and it was therefore important to preserve the original form and appearance of the bridge.

**Client:** Coles County Highway Department

**Services Provided:**

- Assessment of the flood damage incurred
- Existing conditions of the structure
- Phase I and II services

This project reflects Firm  
and Staff experience.
