

**NORTH AURORA RIVERFRONT OVERLOOK,
NORTH AURORA, ILLINOIS**

ESI provided Structural and Site engineering services. The Riverfront Overlook will provide citizens with a pleasing destination point along the Fox River oriented to take advantage of the great views of the River. The Overlook consists of a hexagonal wooden Gazebo, timber deck, ramps and board walk. Structural services included design of the timber structure and the drilled shaft foundations. Site engineering services included grading of the surrounding area and the permitting process with the Illinois Department of Natural Resources (IDNR) as the structure was constructed within the floodplain.

Client: Village of North Aurora (Subconsultant to Design Perspectives)
Services Provided:

- Structural Design
- Foundation Design
- Grading Plan Design
- Shop Plan Review
- IDNR Permitting

This project reflects Firm
and Staff experience.
