

WEST LAKE AVENUE AND GREENWOOD ROAD INTERSECTION IMPROVEMENTS, GLENVIEW, ILLINOIS

Phase I engineering services were provided for this project that consists of improvements to the West Lake Avenue from Pfingsten Road to the Greenwood Road intersection. The project proposed the widening of West Lake Avenue to a three-lane cross-section, modification of pavement geometry, installation of a new sidewalk and bike path, traffic signal installation, pedestrian signal installation, and new storm sewer installation. The Project required preparation of a project development report including environmental coordination and the preparation of a location drainage study, crash analysis and an intersection design study. The Project also required coordination with FHWA, IDOT and the Village of Glenview as construction will utilize STP and ITEP funding.

Client: Village of Glenview

Services Provided:

- Roadway Design
- Drainage Design
- Intersection Design Studies
- Traffic Counts
- Traffic Studies
- Environmental Studies
- Preliminary Engineering
- Cost Estimating

This project reflects Firm
and Staff experience.
