

**VILLAGE WIDE STORMWATER MANAGEMENT
LONG GROVE, ILLINOIS**

ESI Consultants, Ltd. serves the Village of Long Grove for all storm water review and planning including review of residential subdivisions and commercial developments. Municipal Separate Storm Sewer System monitoring and permitting is included as part of the National Pollution Discharge Elimination System permitting. Various regional planning and design studies for storm water improvements are included with Stormwater Management services.

Key issues addressed include compliance with Village Codes, Lake County Stormwater Management Watershed Development Ordinance, Army Corps of Engineers (ACOE) and Illinois Environmental Protection Agency (IEPA) requirements. Various assignments include assistance to the Village and private developers with stormwater plans and erosion controls, native plant restoration, wetland restoration and National Pollution Discharge Elimination System (NPDES) permitting and monitoring.

Services Provided:

- Stormwater Modeling & Management
- Erosion Controls and Monitoring
- Wetland and Native Plant Restoration
- NPDES Compliance

This project reflects Firm
and Staff experience.
